LOCAL AREA NETWORK (LAN) SIMULATION

Expected Console Output

```
============================================================
       LOCAL AREA NETWORK (LAN) SIMULATION
============================================================

Computer: PC1
IP Address: 192.168.1.10
Subnet Mask: 255.255.255.0
Default Gateway: 192.168.1.1

Computer: PC2
IP Address: 192.168.1.11
Subnet Mask: 255.255.255.0
Default Gateway: 192.168.1.1

Computer: PC3
IP Address: 192.168.1.12
Subnet Mask: 255.255.255.0
Default Gateway: 192.168.1.1

============================================================
             LAN CONNECTIVITY TEST
============================================================

PC1 -> PC2 (192.168.1.11)
Status: Reachable
Result: Ping successful

PC1 -> PC3 (192.168.1.12)
Status: Reachable
Result: Ping successful

PC2 -> PC1 (192.168.1.10)
Status: Reachable
Result: Ping successful

PC2 -> PC3 (192.168.1.12)
Status: Reachable
Result: Ping successful

PC3 -> PC1 (192.168.1.10)
Status: Reachable
Result: Ping successful

PC3 -> PC2 (192.168.1.11)
Status: Reachable
Result: Ping successful

============================================================
              SIMULATION COMPLETED
